

X PRESS M 110

(33"x44")

HEAT PRESS MACHINE

Controller:
With time and
temperature

Easy to use
Drawer system with
a pressure adjustment
makes the machine
easy to work

TECHNICAL FEATURES:

Voltage Single-phase: 220V - 41A - breaker 50A - Cable 10 mm ²
Voltage Three-phase: 220V - 24A - breaker 30A - Cable 4 mm ²
Voltage Three-phase: 380V - 14A - breaker 20A - Cable 2,50 mm ²
Power: 9000 W
Temperature controller: 0° a 255C°
Weight: 405 KG
Useful area: 85X110cm - 33" x 43"

Technology and practicality

The Heat Press Machine X-Press M110 is an indicated product for the sublimation with an useful area of 85x110cm (33" x 43"). The resistance is fused in aluminum that works with a great digital controller of time and temperature, ensuring all the same temperature in the heat plate area.

The X-Press M110 works with a drawer system, and have a pressure adjustment making the same a great machine really easy to work.

All these features makes X-Press M110 a perfect option for your job.
